## SUMMARY

---

Senior Software Engineer with 9+ years building B2B SaaS products. Led microservices and cloud infrastructure (GCP, Terraform, Kubernetes) on a full-stack stack (Python, TypeScript, Vue.js) for a platform serving thousands of businesses; owned reliability, delivery, and client-facing technical leadership end to end.

## EXPERIENCE

---

### WiseStamp, Kyiv, Ukraine (Remote)

Feb. 2019 – Present

*Senior Software Engineer*

🌐 wisestamp.com

- **Technical Leadership:** Led architecture and delivery of greenfield microservices (Python, Node.js, TypeScript), owning system design, Vue.js/Tailwind UI implementation, and production rollout across a multi-service B2B SaaS platform.
- **Platform & Infrastructure:** Managed GCP infrastructure with Terraform, Kubernetes, and Docker; built scalable backend services with Redis and Elasticsearch, improving deployment reliability and reducing operational toil.
- **Revenue & Reliability:** Owned reliability and performance of core production services (Redis, Elasticsearch, CI/CD), reducing downtime and incident-driven churn while supporting subscription growth and enterprise retention.
- **Team & Delivery:** Drove sprint planning and backlog prioritization aligned with product goals; mentored engineers through code reviews and technical standards, raising team throughput and reducing rework.
- **Client & Business Impact:** Acted as technical lead in client-facing engagements, translating business needs into shippable solutions and supporting account growth, renewals, and upsell opportunities.

### BITEGRICO, Kyiv, Ukraine

Oct. 2018 – Sep. 2019

*Lead Software Engineer*

🌐 bitegri.co

- **Product Delivery:** Led development of ERP/CRM services (Python, PostgreSQL) that automated sales and operations workflows, reducing manual work and increasing client throughput per engagement.
- **Engineering Leadership:** Served as lead engineer—set technical direction, introduced Docker-based DevOps on AWS/GCP, and owned delivery of business-critical modules tied directly to client revenue.
- **Team Building:** Owned hiring end to end, recruiting and onboarding engineers to expand delivery capacity for new client projects.

### ERP Ukraine, Kyiv, Ukraine

Jan. 2017 – Oct. 2018

*Software Engineer*

🌐 erp.co.ua

- Built core ERP/CRM services and Ukrainian accounting localization (Python, PostgreSQL), enabling compliant reporting and tax workflows that strengthened the product's domestic market offering.

### MPS Development, Kyiv, Ukraine

Jan. 2016 – Dec. 2017

*Software Engineer*

🌐 mpsdevelopment.net

- Engineered large-scale price-monitoring pipelines (Python, Selenium) with automated test coverage, delivering competitive market data that supported client pricing and margin decisions.

## EDUCATION

---

**National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute"**, Ukraine, Kyiv 2017 - 2018

*Master's degree* in Materials science and Computer Simulation

**National Technical University of Ukraine "Igor Sikorsky Kyiv Polytechnic Institute"**, Ukraine, Kyiv 2013 - 2017

*Bachelor degree* in Engineering materials science

## SKILLS

---

- Languages: Python, JavaScript, TypeScript, Node.js
- Backend & APIs: Flask, REST, Microservices, System Design, Technical Leadership
- Data & Messaging: PostgreSQL, MongoDB, Redis, Elasticsearch, GCP Datastore, Kafka
- Cloud & DevOps: GCP, AWS, Azure, Terraform, Kubernetes, Docker, CI/CD, Git
- Frontend: Vue.js, Tailwind CSS
